

Optimizing student success and ensuring NHS alumni the opportunity to receive post-secondary education with minimal costs, the Neodesha Promise Scholarship has given over \$310,000 since the scholarship began in August of 2020.

The scholarship, designed to enhance Neodesha students' preparation for thorough post-secondary education, has given nearly 60 students the chance to strive for academic excellence. This program, created by businessman and former NHS Alumni, Ben Cutler, is to this day continuing to impact students.

Serving the community and contributing to the local economy is part of this scholarship's mission. Over 5,000 hours of community service hours have been completed by scholarship recipients, and students continue to share their passion for service with the help of teachers and faculty.

With nearly 34 student applications for the class of 2022, this program is continuing to provide tuition aid. Thanks to the generosity of many, this program's capacity extends beyond financial support. It is a program that encourages students to have strong values, morals, and character, and to always make a positive difference in the community.
